NAVAIR INSTRUCTION 4710.2

From: Commander, Naval Air Systems Command
To: Distribution List

Subj: Uniform Automatic Data Processing System for Industrial Naval and Marine Corps Air Stations (UADPS for INAS), Workload Control System for Overhaul and Repair Departments

Encl: (1) Record of Changes
(2) Locator sheet

Ref: (a) NAVAIRINST 4710.1 of 8 Feb 1967

1. **Purpose.** This Instruction with reference (a) promulgates in several volumes the management specifications and operating procedures suitable for translation into computer programs for those functions associated with Workload Control in Overhaul and Repair Departments of the Naval Air Systems Command (NAVAIRSYSCOM) industrial activities.

2. **Cancellation.** Subject system management specifications documentation previously transmitted and dated prior to August 1966 are canceled by the identically entitled volumes of the subject manual upon receipt. BUWEPSINST 4710.15 of 5 February 1965 is canceled by this Instruction and NAVAIRINST 4710.1 . BUAERINST 5200.11 of 11 October 1956 is canceled upon implementation of the requirements of this Instruction and NAVAIRINST 4710.1 .

3. **Contents.** The titles of the volumes of this Instruction and a brief description of the contents of each are contained in Volume 1. Volume 1 also contains background information on UADPS for INAS and a general description of the several applications of the UADPS for INAS Workload Control System.

4. **Distribution.** The various volumes will be distributed as they are completed. Initially, Volumes 1, 2, 3, 4, 6, and 7 are being distributed. Additional volumes and/or changes to the various volumes will be transmitted by NAVAIRINST 4710.1 change transmittals as they are prepared. Volume I will be distributed to all addressees. All other volumes will be distributed to action addressees only.

5. **Changes.** As changes are issued and inserted in the appropriate volumes, the Record of Changes pages in the volumes concerned and enclosure (1) hereto should be annotated.

6. _User Development._ The system management specifications in addition to promulgation to addressees are transmitted to a central Naval Air Systems Command Headquarters (NAVAIR) controlled staff of Digital Computer Analysts and Programmers for expansion and translation to program specifications and hence to user programs. The products of this effort are program run books and master library tapes. These are required for computer operation and ultimately customer use. Local Overhaul and Repair Department Management and technical personnel must provide the input data for the computer operation of the system programs.
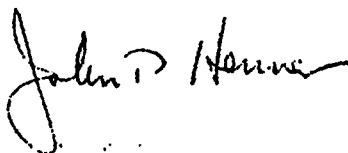

7. _Programs Availability._ Preparation of user programs by system application is currently in process. Availability of these programs will be promulgated by separate correspondence. Implementation plans and schedules based on availability of user programs will also be covered by separate correspondence.

8. _Action._ No immediate specific action is required of addressees upon receipt of this Instruction. Action will depend upon the correspondence promulgated in accordance with the availability of programs and plans as indicated in paragraph 7 above.

9. _Reports and Forms_

    a. Report Symbol NAVAIR 4710-1 has been assigned to UADPS for INAS Workload Control System report requirements.

    b. NAVWEPS Forms 4710/13A, 4710/13B, 4710/13C, 4710/14, 4710/15, and 4710/16 are stocked in the Forms and Publications Segment of the Navy Supply System and should be requisitioned in accordance with NAVSUP Publication 2002. Availability of additional forms required for this system will be included in appropriate change transmittals.

John P. Henne

Distribution: (established quantity)
R10A1, R10J(Cherry Point only), R60A

Copy to (2 copies each unless otherwise shown)
K2(NAVAIR: AIR60315 (10 copies); AIR603211 (40 copies); AIR4224 (100 copies);
M69(Wash - CL only); P10A(Crane (Code 1000) 1 copy)); FRC, GSA, Alexandria

Stocked at NAVAIR (AIR- 4224). Requests for copies must include justification for need
